Tech Snacks in Comics By Wendolyn Velez-Torres

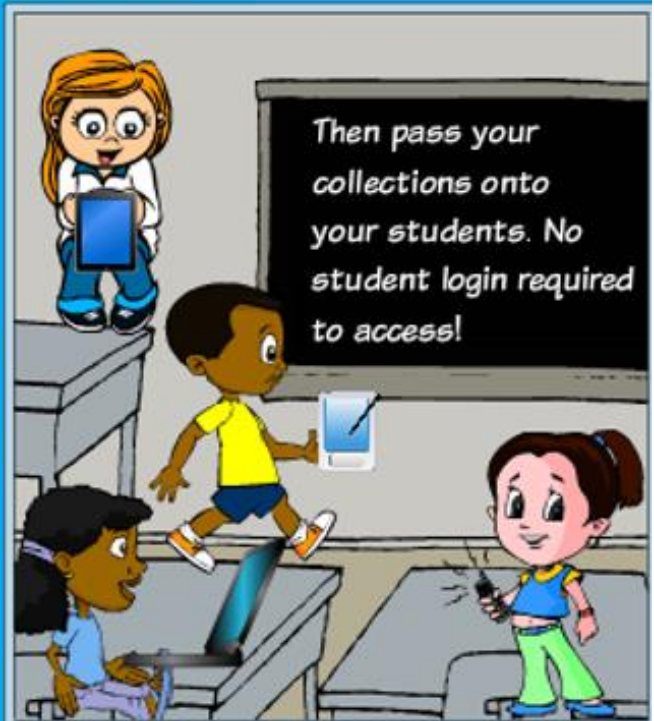

What are these sites for?

???????

With these sites, you can put all your favorite websites in one location.

Students only need one url. With that one url, they will have access to multiple websites!

So, which one should we use with our students?

That's really a matter of preference.

You can add as many websites as you want to any page. You can also make any collection private or public.

Now, *symbaloo* also allows you to add websites on one screen with icons representing the different sites.

With *symbaloo* you can make different collections. Each collection gets their own url. You can have up to 40 sites in a collection.
